In standard Drutex offers single-chamber glass 4/16/4, which shows a thermal insulation coefficient that amounts for $U=1.0 \text{ W/m}^2\text{K}$, according to the norm PN-EN 674.

Additionally, windows can be equipped with the thermal frame, which significantly decreases heat loss in comparison to traditional aluminum frames.

www.drutex.eu

As per our customers' individual needs DRUTEX offers different types of glass, i.e.: float 6mm and 8mm, antisol, reflect-float, ornaments, safe, anti-burglar as well as the door panels made of PVC or polycarbonate.

DRUTEX also received certificates, which allow to mark the composite glass with the CE mark as well as the certificates which determine the thermal insulation and acoustic coefficients.
